

NEW NATIONAL ADVERTISING

Service Detail Pages • Replit Implementation Prompt

Use this prompt in the existing project to turn every service into a dedicated, informative and bookable service page with a unique premium visual.

NEW NATIONAL ADVERTISING — SERVICE DETAIL PAGE IMPLEMENTATION PROMPT

IMPORTANT:

Upgrade the existing website by making EVERY service in the “Our Services” section clickable.

Each service must open its own dedicated service detail page with a premium, professional, informative design.

Do NOT create one generic page with all services mixed together.

Use reusable dynamic service-page components so every service can have its own content, image, details and CTA.

=====

SERVICE ORDER

Keep the current “Our Services” order as:

1. Sign Boards
2. Solvent Flex
3. Offset Printing
4. Screen Printing
5. Graphics Design
6. Banner Printing
7. Digital Printing

Every service card must have a clear:

“More Info →”

interaction.

Clicking the card or More Info should open the corresponding dedicated service page.

=====

ROUTES

Create proper routes such as:

```
/services/sign-boards
/services/solvent-flex
/services/offset-printing
/services/screen-printing
/services/graphics-design
/services/banner-printing
/services/digital-printing
```

Do NOT create separate hardcoded pages with duplicated code.

Use one reusable service-detail template and structured service data.

=====

SERVICE DETAIL PAGE DESIGN

Each service page should feel like a premium mini landing page for that particular service.

The page should contain:

1. Breadcrumb
2. Service category
3. Large service title
4. Short professional introduction
5. Large premium AI-generated/visual image
6. Detailed service information
7. What we offer
8. Suitable use cases / applications
9. Available options/materials
10. Why choose this service
11. Quote / booking CTA
12. Related services

Keep the design consistent with the main New National Advertising website.

The visual style must remain:

- soft
- minimal
- professional
- premium
- clean
- modern
- spacious
- trustworthy

Do NOT make the detail pages overly flashy.

=====
HERO AREA
=====

At the top of every service detail page create a beautiful two-column hero.

LEFT:

Small eyebrow:
NEW NATIONAL ADVERTISING • SERVICES

Large title:
For example:

DIGITAL
PRINTING

Below it:

A concise professional description explaining the service.

RIGHT:

A LARGE, HIGH-QUALITY AI-GENERATED VISUAL specifically representing that service.

The image is extremely important.

Do NOT use the same generic image for every service.

Each service needs its own visual.

=====
AI-GENERATED SERVICE IMAGES
=====

Create/use a visually appropriate AI-generated image for EACH service.

The image should look like professional commercial photography or premium product visualization.

It must clearly communicate the actual service.

Examples:

SIGN BOARDS:
A modern storefront with elegant acrylic lettering, LED signage, backlit letters and premium signage installation.

SOLVENT FLEX:
Large-format flex printing, rolled printed vinyl/flex material, vibrant advertising banner and professional print-production environment.

OFFSET PRINTING:
Beautiful stacks of brochures, business cards, letterheads, catalogs and premium paper printed with accurate colors.

SCREEN PRINTING:
Professional screen-printed T-shirts, bags, caps and promotional materials with visible print texture.

GRAPHICS DESIGN:
A clean creative desk showing branding layouts, logo concepts, brochures, packaging, menus and digital design screens.

BANNER PRINTING:
Large-format advertising banner being printed and displayed in a professional commercial environment.

DIGITAL PRINTING:
High-quality digital printer producing brochures, posters, cards and colorful marketing materials.

IMPORTANT:
Images should be visually rich and colorful enough to give the website more life, while the UI itself remains minimal.

Do not make the images look cartoonish.

Do not use low-quality generic stock imagery.

Do not put fake client names or fake brands in generated visuals.

If text appears inside an AI-generated image, keep it minimal and non-essential because AI-generated text may be inaccurate.

=====

SERVICE INFORMATION

=====

Use the following actual service information.

1. SIGN BOARDS

Title:
Sign Boards

Description:
Professional signage solutions designed to make businesses, brands and storefronts visible and memorable.

Offerings:

Offerings:

- Visiting Cards
- Brochures
- Catalogues
- Pamphlets
- Posters
- Annual Reports
- UV Print
- Hotel Menus
- Hospital Files
- Trophy Stickers

CTA:
BOOK THIS SERVICE

=====

DETAILED SERVICE CONTENT

=====

Each page should NOT be just:

image + paragraph + button.

Make the information genuinely useful.

For every service create sections such as:

WHAT IS [SERVICE]?

A clear explanation in simple professional language.

WHAT WE OFFER

A clean list/grid of the actual offerings.

WHERE IT WORKS BEST

Explain practical applications.

WHY CHOOSE THIS SERVICE

Use general factual benefits relevant to the service.

Do not make unsupported claims like:

"Best in Mumbai"

"Cheapest"

"#1"

"Guaranteed quality"

unless the business explicitly provides evidence.

=====

BOOK THIS SERVICE CTA

=====

Every service page must have a prominent CTA:

BOOK THIS SERVICE →

When clicked, open a professional enquiry/booking form.

The form should automatically know which service the customer selected.

For example, if the user is on:

Digital Printing

the form should automatically show:

Service:

Digital Printing

Fields:

Name

Phone Number

Email

Service

Requirement Details

Quantity

Preferred Date

Upload File (Optional)

Button:

SEND ENQUIRY →

=====

WHATSAPP BOOKING

=====

Also provide:

BOOK VIA WHATSAPP →

Use:

<https://wa.me/919555759677>

Generate a dynamic prefilled message.

Example for Digital Printing:

Hello New National Advertising, I would like to book/enquire about Digital Printing.

I would like to discuss:

[service requirement]

Make the service name dynamic.

=====

CALL CTA

=====

Provide:

CALL NOW

Phone:

+91 9555759677

Use:

tel:+919555759677

=====

QUOTE FORM

=====

The service enquiry form should be visually consistent with the main website.

Use:

Name

Phone

Email

Service
Requirement
Quantity
Preferred Date
Upload File

Use clean inputs, soft borders and subtle focus states.

Do not claim that the form actually sends data unless a real backend/email service is configured.

If the current project already has a form backend, connect to it properly.

=====
RELATED SERVICES
=====

At the bottom of every service detail page add:

YOU MAY ALSO NEED

Show 3 related service cards.

Examples:

Digital Printing:
- Offset Printing
- Graphics Design
- Banner Printing

Sign Boards:
- Solvent Flex
- Banner Printing
- Graphics Design

Solvent Flex:
- Banner Printing
- Sign Boards
- Digital Printing

Use the existing service-card design.

=====
BREADCRUMBS
=====

At the top:

Home
→ Services
→ Digital Printing

Change dynamically for each service.

=====
BACK BUTTON
=====

Add a subtle:

← Back to Services

link near the top.

=====
IMAGE DESIGN
=====

Service images should be one of the strongest visual elements.

Use:

- realistic lighting
- premium composition
- professional materials
- natural colors
- printing-related textures
- clean backgrounds
- subtle depth

Do NOT make every image blue.

Use natural print colors including:

Cyan
Magenta
Yellow
Orange
Red
Green
Blue

This helps the website communicate that New National Advertising works in printing and visual advertising.

The surrounding UI must remain soft and minimal.

=====

ANIMATION

=====

Use Framer Motion.

Keep animations subtle:

- image fade/reveal
- title reveal
- soft section entrance
- gentle image zoom
- CTA hover
- card hover
- smooth page transition

Do NOT use:

- excessive parallax
- spinning objects
- huge text animations
- flashy transitions
- 3D effects
- excessive blur

=====

MOBILE

=====

Service pages must be excellent on mobile.

Mobile order:

Breadcrumb
Title
Image
Description
Service Details
Offerings
Applications
Why Choose
Book This Service
Related Services

Make the CTA easy to access.

Consider a small fixed mobile action bar:

CALL
WHATSAPP
BOOK

Do not let it cover important content.

=====

NAVIGATION

=====

The existing navigation should remain unchanged.

Services in the navbar should lead to the main Services section/page.

Products remains a separate page in the top navigation.

Do NOT replace Products with Services.

=====

SEO

=====

Each service page must have a unique SEO title and meta description.

Examples:

Digital Printing:

Digital Printing in Mumbai | New National Advertising

Sign Boards:

Sign Board Services in Mumbai | New National Advertising

Solvent Flex:

Flex & Large Format Printing in Mumbai | New National Advertising

Use the appropriate service name dynamically.

Add:

- canonical URL
- Open Graph title
- Open Graph description
- descriptive image alt text
- semantic headings

Do not keyword-stuff.

=====

TECHNICAL IMPLEMENTATION

=====

Create structured service data.

For example:

```
services = [  
  {  
    slug,  
    title,  
    description,  
    image,  
    offerings,  
    applications,  
    relatedServices  
  }  
]
```

Use a reusable:

```
<ServiceDetailPage />
```

component.

Use dynamic routing.

Do not duplicate the same page code seven times.

=====

IMPORTANT

=====

The current homepage design should NOT be destroyed.

This task is to add a complete, premium service-detail experience to the existing website.

Keep the current:

- navbar
- overall color system
- typography
- button style
- card style
- spacing
- responsive behavior

Improve the website by adding detailed service pages.

=====

FINAL QUALITY CHECK

=====

Before finishing:

1. Click every service card.
2. Confirm every service opens its correct page.
3. Confirm the correct service information appears.
4. Confirm each service has its own appropriate image.
5. Confirm images are high quality.
6. Confirm Book This Service works.
7. Confirm WhatsApp booking contains the correct service name.
8. Confirm Call Now works.
9. Confirm enquiry form automatically selects the current service.
10. Confirm related services work.
11. Test desktop.
12. Test tablet.
13. Test mobile.
14. Check for horizontal overflow.
15. Check console errors.
16. Check page transitions.
17. Check SEO metadata.
18. Make sure no fake claims or fake client information were introduced.

MOST IMPORTANT:

When someone clicks "Digital Printing", they should feel like they have entered a dedicated professional Digital Printing service page, not just expanded a card.

Each service should have:

A BEAUTIFUL IMAGE

+

CLEAR INFORMATION

+

REAL SERVICE DETAILS

+

APPLICATIONS

+

BOOK THIS SERVICE

+

WHATSAPP ENQUIRY

+

RELATED SERVICES

The result should feel like a premium professional printing company's website, while remaining soft, minimal and easy to use.
