

NEW NATIONAL ADVERTISING

COMPLETE PRODUCT CATALOG IMPORT PROMPT

Source of Truth: The complete product list in this document. Every category and every product name must be preserved exactly.

IMPORTANT

- Use the complete product list provided in this PDF as the EXACT source of truth.
- Do not skip any product, miss any product name, remove any category, merge different products, rename products, invent products, place products in the wrong category, stop halfway, or add these products to Projects.

GOAL

- Create the complete Products catalog on the PUBLIC PRODUCTS PAGE, organized CATEGORY-WISE and PRODUCT-NAME-WISE.
- Every category below must exist, and EVERY product listed under that category must appear on the Products page.

PRODUCT PAGE REQUIREMENTS

- Visible category sections/filtering.
- Category-wise product organization.
- Individual product cards.
- Exact product names as provided below.
- Search/filter functionality if the existing Products page supports it.
- Products connected to the production Firebase/Firestore database.
- Admin Panel category selection for every product.
- Admin Panel ability to edit/delete products.
- Product images may remain EMPTY/null for now.
- DO NOT generate AI images at this stage.
- DO NOT use third-party/Nivara product images.
- Images will be uploaded later through the Admin Panel.

FIRESTORE

- Each product must have at minimum: name, category, image/imageUrl (empty/null for now), and active/status as supported by the existing schema.
- The category field must contain the exact category under which the product is listed below.
- If the same product name appears in multiple categories, preserve the category relationship exactly as listed. Do not delete it just because the name already exists elsewhere.

COMPLETE CATEGORY + PRODUCT LIST

Categories: 12 Listed product entries: 202

1. CORE PRINTING & BRANDING

- Flex / large-format printing
- Digital printing

- Tile printing
- Neodymium magnets
- Stainless-steel nameplates
- Stainless-steel sippers
- Coffee mugs
- QR stands
- Scratch cards
- USB drives
- Canvas printing

PRODUCT PAGE STRUCTURE & ADMIN PANEL

- Create the Products page using the exact structure above.
- Show all 12 categories clearly on the public Products page.
- Users must be able to browse products category-wise.
- Do NOT create one giant unorganized product list.
- Admin Panel must have a Category field/dropdown when creating or editing a product.
- Admin must be able to add a product, select category, edit product name, change category, upload/replace image later, delete product, and activate/deactivate product.

IMAGE REQUIREMENT

- Keep product images EMPTY/null for this catalog import.
- Do not generate AI images.
- Do not download Nivara images.
- Do not use random placeholder product images.
- Do not use base64 images, blob URLs, or temporary local image paths.
- Keep the existing Admin Panel image upload system ready so images can be uploaded later through Firebase Storage.

DATABASE & PERSISTENCE

- Use the existing production Firebase/Firestore architecture.
- Do not create a temporary JSON-only catalog.
- All imported products must persist after page refresh, Admin Panel refresh, deployment, and logout/login.

DUPLICATE HANDLING

- Before inserting each product, check the existing database.
- If the exact same product already exists under the same category, update/reuse the existing record instead of creating a duplicate.
- If the same name exists under a DIFFERENT category listed above, preserve the category relationship from this document.
- Do not delete existing valid products unless they are clearly duplicates of the exact same product/category combination.

COMPLETION CHECK

- DO NOT REPORT "COMPLETED" UNTIL YOU HAVE VERIFIED THE ENTIRE LIST.
- Compare: PDF/PROMPT LIST VS FIRESTORE PRODUCTS VS PUBLIC PRODUCTS PAGE VS ADMIN PANEL.
- Verify all 12 categories exist.
- Verify every listed product exists.
- Verify every product has the correct category.
- Verify no listed product is missing.
- Verify no accidental duplicates.
- Verify no product was placed in the wrong category.
- Verify products appear on the public Products page.
- Verify categories are visible/selectable.
- Verify Admin Panel shows the correct category.
- Verify products persist after refresh.
- Verify Firebase/production data is being used.
- Process ALL 12 categories from beginning to end. Do not stop after the first few categories.

FINAL VERIFICATION REPORT

Total categories: **12**

Total product entries listed in this document: **202**

Imported/verified: [number]

Missing: [number]

Duplicates: [number]

Incorrect category assignments: [number]

FINAL REQUIREMENT: Missing = 0 and Incorrect category assignments = 0.

If anything is missing, fix it before reporting completion.
